

AMENDMENTS TO THE SPECIFICATION

Please replace the present title with the following amended title:

**INFORMATION REPRODUCING APPARATUS AND METHOD FOR CACHING
AND SELECTIVELY REPRODUCING INFORMATION FROM RECORDING MEDIA**

Please amend page 1, paragraph 5, as follows:

For example, in case of reproducing the program information corresponding to an address specified by a ~~an~~ user, the direction, time or distance of moving the optical pickup is calculated from the current position of the optical pickup and the address location where the program information is recorded, when the address is ~~id~~ specified, and then the optical pickup is moved to the top position of the program information on the basis of the calculated result, whereby the desired program information can be reproduced.
